

# Correction to Synthesis of Silver Nanoprisms with Variable Size and Investigation of Their Optical Properties: A First-Year Undergraduate Experiment Exploring Plasmonic Nanoparticles

Andrew J. Frank, Nicole Cathcart, Kenneth E. Maly, and Vladimir Kitaev\*

*Journal of Chemical Education* 2010, 87, 1098–1101. DOI: 10.1021/ed100166g

## Supporting Information

Due to a scaling error, the amounts for the sodium citrate, potassium bromide, and sodium borohydride are incorrect in the Instructor Notes section of the Supporting Information for this experiment. This information is critical for correctly adapting our experiment and it unfortunately does not agree with the Experimental section in the article or the student handout section in the Supporting Information, both of which are correct.

The correct Supporting Information can be found at [here](#).

## ASSOCIATED CONTENT

### Supporting Information

Description of the experimental procedure; preparation of materials provided to students; instructor notes; results of a typical student lab; CAS registry numbers. This material is available via the Internet at <http://pubs.acs.org>.
